

The standing seam metal roof  
that harvests energy from the sun.

*“Finally, an affordable, best-of-breed solar standing seam roof system has arrived.”*

Architects and building owners challenged our industry with five key essentials for a successful solar roofing product, all of which Fabral’s Solar SSR panels deliver.

1. Total integration with Standing Seam Roof Panels.
2. A complete, standardized solar roof system that includes all schematics and specifications for all electrical components.
3. Product delivery and support from a reputable standing seam roof manufacturer.
4. ROI of 10 years or less.
5. 20-year warranty

*“Fabral’s Solar SSR delivers all five key essentials and more.”*

## Premium Building Integrated Photovoltaics (BIPV)

In this age of rising energy costs and the demand for sustainable design, Fabral is pleased to offer a green solution for your metal roofing designs.

Fabral’s Solar SSR system was designed with the highest quality, UL approved components. The flexibility and durability of these laminates make them ideal for metal roofs, where expansion, contraction and curving are considerations. Unlike polycrystalline photocells that are heavy and fragile, no roof penetrations and no additional structural support are required. In fact, you can walk on the laminates, which maintains the roof’s overall serviceability. And the panel/laminate bond that’s created has been tested and proven to withstand wind of 160 mph.

And when it comes to generating electricity, compared to any other technology, Fabral’s Solar SSR laminates achieve higher relative efficiency under high temperatures and low light.

### Request an ROI Analysis Today

Fabral’s Solar SSR is appropriate anywhere you would determine your ROI. Visit [www.fabral.com](http://www.fabral.com) to get started. Or call your Fabral representative today.

Available Solar SSR Panel Profiles from Fabral include:

### Architectural/Commercial

#### Thin Seam

#### Slim Seam

#### Snap-on-Seam

### Post Frame/Residential

#### 1 1/2" SSR

### Electric Is Included

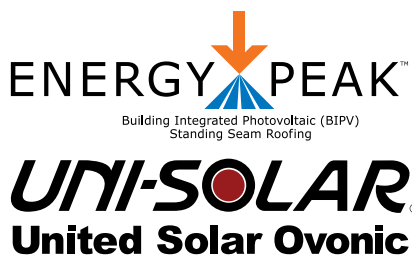

When you specify Fabral's Solar SSR panel you get the complete system. This includes all schematics and specifications for wiring and electrical components for an electrical subcontractor to implement. Upon commissioning of the system, your Solar SSR system will begin generating clean, renewable electric power that's sent directly into the power grid through the building's electric meter.

### A System Size for Any Budget or Requirement

No matter what your budget or your building's requirement, Fabral has a solar standing seam roof system for you, including 3, 5, 7, 15, 30, 60, 125, and 250 kw systems. Custom size systems are also available.

ordinarily specify standing seam roofing. If you have a project that can use the Solar SSR panel, let us run the numbers for you to  
d.
